SOG

PHOTOGRAPHS BY DISTRICT PERSONNEL FIELD INSPECTIONS & OBSERVATIONS

It is policy for any employee of the Alpine Fire District to take photographs while out in the field for reference of a violation or unsafe condition in question. This could include, but not limited to photographs of electrical appliances, fire safety systems, weeds and brush, sprinkler components, and wiring,

Many times fire personnel may see something that may require further observation by other Fire Code Officials of the District. These photographs also aid in review of annual inspections to determine changes that occur in the course of a year.
